Department of Chemical Engineering

The Department of Chemical Engineering is committed to providing quality technical education by combining strong academic fundamentals with practical industrial exposure. Throughout the academic year, the department has organized expert guest lectures by experienced industry professionals to enhance students' technical knowledge and awareness of current industrial practices. Industrial visits to leading chemical and process industries have provided valuable real-world learning experiences, helping students understand modern manufacturing processes and safety standards. The department has consistently achieved commendable academic results, reflecting the dedication of both students and faculty members. In addition, successful campus placement activities have enabled many students to secure career opportunities in reputed industries, highlighting the department's focus on skill development, employability, and professional excellence. The department continues to encourage innovation, discipline, and lifelong learning to prepare students for successful careers in the chemical engineering profession.
